

Stay informed, stay safer

Use the NHS COVID-19 app to get two types of alert that will help protect you and your loved ones:

Venue alerts

Checked in to a place where COVID-19 has been identified?
The app will let you know and advise you to take a test.
A venue alert will not ask you to self-isolate.

Contact tracing alerts

Been close to someone for over 15 minutes who has the virus?
Keep your Bluetooth on to find out.
If you get a contact alert and are fully vaccinated you'll need to take a test, but only self-isolate if it's positive.

To download, search for the **NHS COVID-19 app**
